

Final Project

Michel Ramirez

Prompt #1

Has my career interest changed?

Yes, and no. My career interest continues to be UX Design (User Experience Design). A UX Designer is in charged of designing the entire interface, components and overall interaction of a user with a computing device or application. The career panels that Hack the Hood hosted helped me strengthen my resolution to go into UX Design. However, I would like to continue learning Python and other languages to eventually become a Front-End Engineer.

What made me remain interested in this career?

UX Design is one of few careers that opens doors to different opportunities. For example, one can work for big companies or be a freelancer. In UX Design, you can also specialize on one characteristic of UX Design.

Brief Overview of UX Design

Characteristics of a good user experience

- Usable
- Equitable
- Enjoyable
- Useful

Salary: Average base is \$107, 388 per year, depending on location and experience.

To become a UX Designer

- Self-taught
- Formal way

Prompt #2

What area(s) of technology and social and racial justice are most interesting to you? How would you like to use technology to address these issues?

What I like about UX Design is that it focuses on solving a(n) issue(s) that a user experiences. As a UX Designer, I will focus on creating an equity-focused design that will enhance the experience of underrepresented communities.

Prompt #3

What technical career skills (hard or soft skills) have you learned in your 8 weeks with HTH and how do you plan to use these skills moving forward to help progress your career?

Some skills that I learned during my 8 weeks in HTH are computer programming, typing speed, teamwork, research, and attention to detail.

I will continue to improve my computer programming skills by signing up to computer programming classes or self-taught.
